Integrated SEED SOLUTIONS

SEASON OVERVIEW

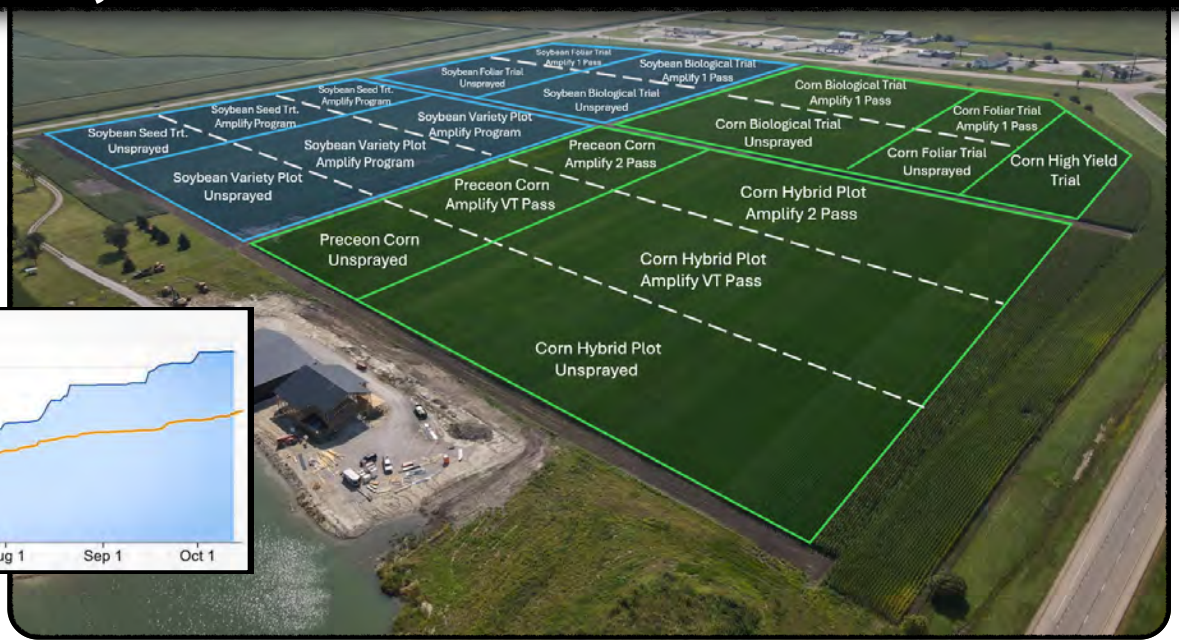

Looking back at the 2026 season, critical weather such as heavy rainfall, severe wind, etc., played an important role on yield results this harvest season. Variability was undoubtedly the theme of 2026, with nearly 10" of rainfall above average for the growing season throughout many parts of Illinois. While there are still many key learnings from this year to incorporate moving forward, it remains important to consider what has also been successful in the past. Hybrid and variety selection, nutrient management strategies and crop protection can all be subject to change from year to year when the desired outcome is not achieved for various reasons. As we plan for the 2027 season, always consider multi-year information when considering what changes to make.

CORN RESULTS - BIOLOGICALS

Biotrinsic M46 Performance Summary:

- Forms a living beneficial microbial community that grows around and with plant roots all season long
- Shown to enhance root development and the crops' ability to access and retain water
- Helps improve water uptake and reduce water loss during drought stress and during critical reproductive and grain fill stages
- Improves nutrient availability and uptake, especially of essential macro- and micro-nutrients including: N, P, K, S, Mg, Mn, Cu & Fe

Biotrinsic M46 Silage Results:

CORN RESULTS - BIOLOGICALS

EXCLUSIVE 2027 Amplify Launch Corn Overview:

PREPHYTE™ BROAD-SPECTRUM FUNGICIDE

Broad-spectrum, EPA-registered fungicide for prevention, control or suppression of many soil-borne diseases

POWERGUARD™ BROAD-SPECTRUM BIOFUNGICIDE

EPA-registered biofungicide that primes the plant's natural defenses to respond quickly and powerfully when facing pressure

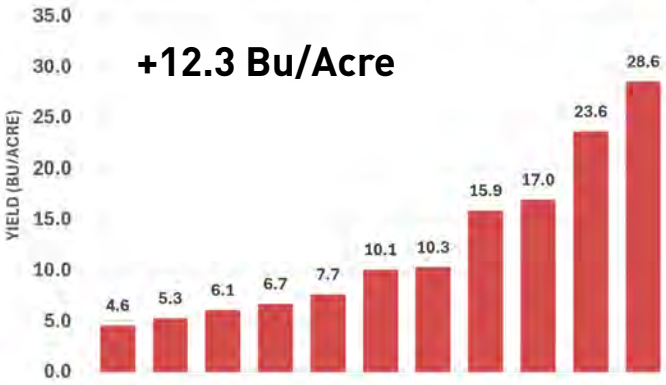

Amplify LAUNCH | CORN Planter Box Treatment

IONLOCK Zn-C+

Base Pail & Seed Fluency:
Graphite-based fluency
1.35 lbs IonLock Zinc
equiv. to 1 qt 9% Zn EDTA

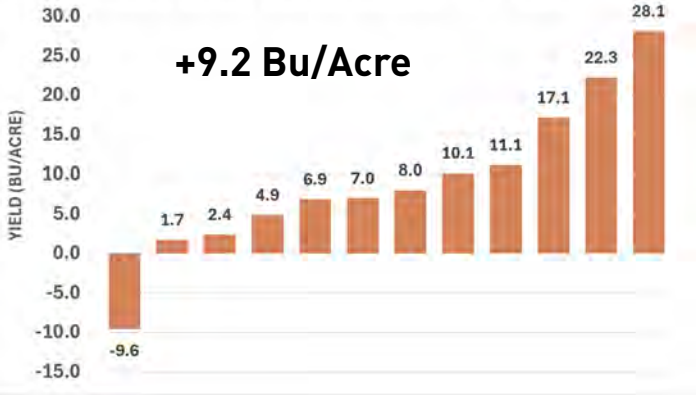

POWERGUARD TRIAL PERFORMANCE

Biotrinsic M34+N13 Inoculant Performance

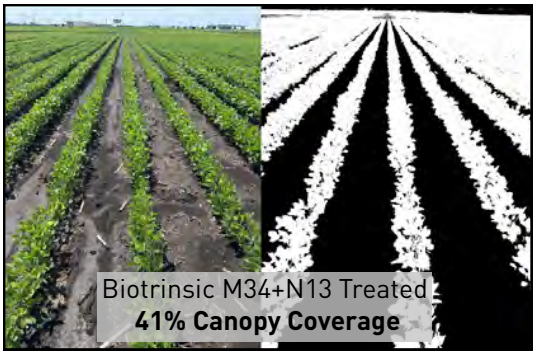

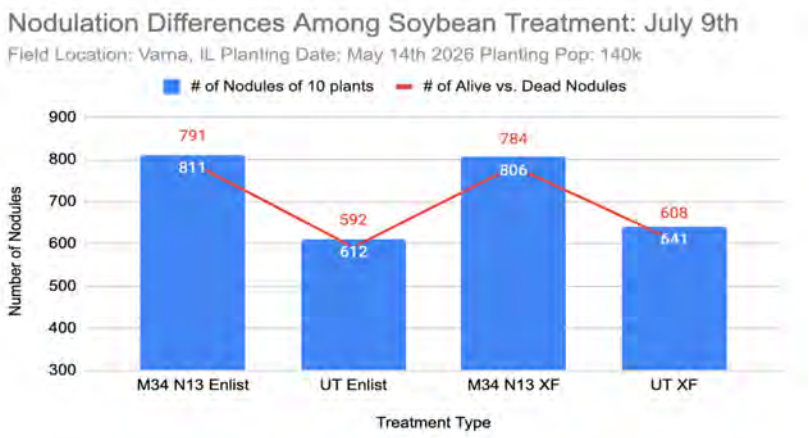

biotrinsic® M34 + N13 combines the benefits of Indigo's M34 and N13 products, combining the nutrient-related capabilities of Indigo's *Bacillus subtilis* strain with the nitrogen fixation-related benefits of *Bradyrhizobium*. Together, they accomplish nitrogen fixation along with uptake of phosphorus, potassium, and most other micronutrients, including iron.
